

Manual Testing Have a user-friendly B2C website to boom the sales, and also bring great functional designed journals/planners to the users who need them. The B2C model makes the display and purchasing more convenient. As a niche, it already contains a wide range of users. It'd be nice to get their attention and have the sales take off. Header Navbar • Expectation: Display on every page. On a smaller screen, the icon and the other options will be toggled in a burger button on the left top. • Test: Visit every page on different sizes of screens. • Result: Worked as expected. Navbar – Login:

Navbar – Not log in

Navbar – Small Screen without log in:

Navbar – Small Screen log in: Logo • Expectation: When the user clicks the logo, they will be redirected to the homepage. But it disappears on the small screen. The option is replaced by the “home” tab on the top left burger menu. • Test: Try every page on the big screen. When I click on the logo, the page gets redirected to the home page. I also tried the top left burger menu on the mobile screen with the “home” tab. • Result: Worked as expected. The Logo:

Example: Logo on Profile page: Example: Logo on Product Page: Free Delivery Banner • Expectation: It appears on every page to push sales. • Test: Try on both big and small screens and every page. • Result: Worked as expected. The banner:

Example: Banner on Profile Page: Example: Banner on Product Page: Search Bar • Expectation: On the big screen, the search bar shows at the top of the page. Users can type keywords in it and search. On small screens, the search bar will be shrunk into an icon. When the user clicks it, the search bar shows. • Test: Try on both big and small screens. • Result: Worked as expected. Search Bar on Big Screen:

Search Bar on Small Screen: Search Bar on Small Screen when click, with search bar showing under:

Account Icon • Expectation: This icon shows on every page. On big screens, it shows with text under it says “Accounts,” but no text on smaller screens. It is a dropdown menu. When the user clicks this icon, there are options for login user to view their profile and log out. For not login users, there are options for logging in and registering. The users will be redirected to the pages according to what they clicked on in the menu. There is also a “Product Management” option in the menu for superusers only. • Test: Try on both big and small screens, log in or not log in. • Result: Worked as expected. Account Icon on Big Screen:

Account Icon on Small Screen:

Account Icon – Dropdown menu without login: Account Icon – Dropdown menu superuser login: Account Icon – Dropdown menu user login: Contact Icon • Expectation: This icon shows on every page. It is linked to the contact page. Any user on the site can see it. Like the Account icon, there is a text under the icon it says “Contact” on the big screen, not on small screens. • Test: Try on both big and small screens, log in or not log in. • Result: Worked as expected. Contact Icon on Big Screen:

Contact Icon on Small Screen:

Wishlist Icon • Expectation: This icon shows on every page only if the user is logged in. It is linked to the wishlist page. Alike the Account icon, there is a text under the icon it says “Wishlist” on the big screen, not on small screens. • Test: Try on

both big and small screens, log in or not log in. • Result:Worked as expected.

Wishlist Icon on Big Screen:

Wishlist Icon on Small Screen:

Shopping Cart Icon • Expectation: This icon shows on every page. It is linked to the user's shopping cart page. Like the Account icon, there is text under the icon indicating the current total in the shopping cart. If there is no product in the cart, it shows "\$0.00" on the big screen, not on small screens. So to let users know that there is something in the shopping cart, the cart icon will turn blue on the small screens. • Test:Try on both big and small screens. • Result:Worked as expected.

Shopping cart Icon on Big Screen:

Shopping cart Icon on Small Screen:

Shopping cart Icon turn blue on Small Screen when there is product in it:

Main Nav • Expectation: The nav breaks into four parts under the header on the big screen. They separated the products into different categories, and the first "All Products" dropdown menu contains options for users to view items by category, brand, and price. On small screens, these options are in the top left burger button. • Test:Try on both big and small screens. • Result:Worked as expected. Main Nav on Big Screen: Main Nav folded in to burger menu on Small Screen:

Homepage Body • Expectation:A background picture is on the center of the screen, with a button "Shop Now," which links to the product page. • Test:Try on both big and small screens. • Result:Worked as expected. Homepage Body on Big Screen: Homepage Body on Small Screen:

Footer • Expectation:It shows on every page. Stick to the bottom. There are three social account icons listed on top of the footer. Users can click on them and be redirected to those pages. Next is the newsletter input field connected to the site owner's MailChimp account. The owner will have the information whenever users send their email address from that box. Under the newsletter are two links, "About Us" and "Shipping Policy," which contain information about the online store. The very last part is the copyright. • Test: Try on both big and small screens and every page. • Result:Worked as expected. Footer on Big Screen Footer on Small Screen:

Log In • Expectation:The user can click on the account icon on the top and choose "log in" from the dropdown menu. They will be redirected to the page. If the user has never signed up before, they can click the link on the text to be linked to a register page. If they already have an account, they can enter their username and password, then log in. There is also a link to reset the password if they forget it. • Test: Try on both big and small screens. • Result:Worked as expected. Log in Page on Big Screen Log in Page on Small Screen:

Sign Out • Expectation:A login user can click on the account icon on the top and choose "sign out" from the dropdown menu. Then they will be redirected to the page with two buttons, "Cancel" and "Sign Out." If they cancel, the user won't be signed out, or they are just redirected to the home page without logging in. • Test: Try on both big and small screens. • Result:Worked as expected. Sign Out Page on Big Screen: Sign Out Page on Small Screen:

Register • Expectation:The user can click the account icon on the top and choose "register" from the dropdown menu. They will be redirected to a page with sign-up forms. They must fill out their email address, user name, password, etc. Then they can

click the button at the bottom or choose the login button to log in if they have an account. • Test: Try on both big and small screens. • Result:Worked as expected.

Register Page on Big Screen: Register Page on Small Screen:

Product All Products Page • Expectation:When users click on the All Product tab on the top nav or the "Shop Now" button on the background picture on the home page, they will be redirected to this page, which contains all products on the page, with a product image, name, category, friendly name. Users can click on any pictures to be redirected to the specific product detail page. And there are also "edit" and "delete" options showing but only for the superuser. • Test: Try on both big and small screens. • Result:Worked as expected. All Products Page on big screen:

All Products Page on Different Smaller Screens:

All Products Page - By price • Expectation:When the user clicks that option, the products will be filtered by price, displaying products from the cheapest product to the most expensive product. Users can click on any pictures to be redirected to the specific product detail page. There are product images, names, categories, and friendly names. And there are also "edit" and "delete" options showing but only for the superuser. • Test: Try on both big and small screens. • Result:Worked as expected.

Product Detail Page • Expectation:When a user views a product detail page, there will be an image of the product on the left side or a No Image pic if there's no image. On the right side, there are product name, price, an option of "Add to Wishlist" for login user, and "edit"/"delete" options for superuser, product description. Below is the quantity box for the user to minus or add quantity. Then the following line is two buttons, "Keep shopping" and "Add to cart." Then there is a horizontal line that keeps the review part in the lower section of the page. With the button "Write a review," the login user can be redirected to the add review page. For not login users, they will be redirected to the login page. If there are any reviews of the product, they will be shown in this section too. • Test: Try on both big and small screens. • Result:Worked as expected. Product Detail Page on Big Screen:

Product Detail Page on Small Screen:

Product Review Page • Expectation:Login users can write a product review by clicking the product detail page button. They will be redirected to this write review page and then leave their comments by clicking the button at the bottom. When the review is added to this product detail page, it will be shown under the product information. And the user can also edit or remove the comment by clicking on the links. The user can revise and re-send the review on the edit review page. • Test: Try on both big and small screens. • Result:Worked as expected. Product Review Button on Big Screen:
